

Now Available New Rotators from

Take your carriage functionality to the next level

The CAM® rotator is used in applications where a solution is required to revolve the load in either direction with palletized containers, boxes, drums or just the forks.

This attachment can be used in several industries, from manufacturing to food processing plants. The CAM® rotator is manufactured with high quality materials and components for durability and dependability.

- The opening in the center of the rotator gives great visibility for the lift truck operator.
- The standard PRC model has a 360° rotation.
- Standard lift truck forks can be fitted by securing in place with the fork locking bars supplied.
- 1 hydraulic function
